

WATER REMEDIATION & FILTERING SOLUTIONS

RESTORING WATER QUALITY.
PROTECTING ECOSYSTEMS.

Aragonite's natural chemistry helps remove contaminants, stabilize pH, and improve water quality in a wide range of applications.

RESTORES WATER QUALITY
Removes impurities and contaminants

pH STABILIZATION
Buffers pH for optimal water balance

ECO-FRIENDLY
Natural mineral solution for sustainable results

COST-EFFECTIVE
Long-lasting performance with low maintenance

KEY BENEFITS

Natural mineral media for effective contaminant removal

High purity & low impurities for reliable performance

pH stabilization for improved water quality

Long service life and high durability

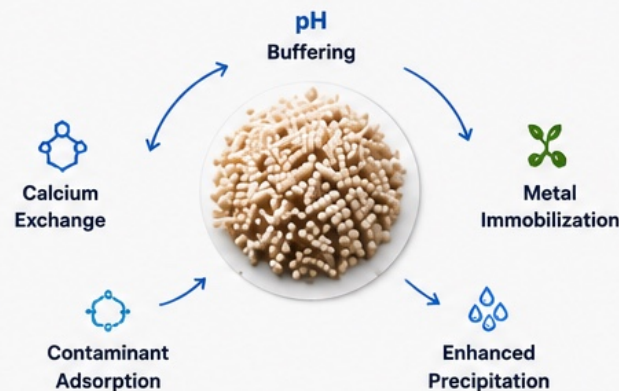

Environmentally friendly and non-toxic

Supports metal removal and precipitation

TREATMENT MECHANISMS

TYPICAL CONTAMINANTS ADDRESSED

- | | |
|---------------------------------|---------------------|
| ✓ Heavy Metals (Pb, Cu, Zn, Cd) | ✓ Arsenic |
| ✓ Hardness (Ca, Mg) | ✓ Fluoride |
| ✓ Iron & Manganese | ✓ Sulfates |
| ✓ Ammonia | ✓ Organic Compounds |
| ✓ Phosphates | ✓ Suspended Solids |

Aragonite media works naturally with water to remove impurities and support cleaner, safer water.

APPLICATIONS

Drinking Water Treatment

Industrial Wastewater

Mine Water Treatment

Agricultural Runoff

Surface & Groundwater Remediation

Coastal & Beach Nourishment

OCEAN
RENEWED

CARBON
NEGATIVE

HIGH PURITY
CaCO₃
